

kerbside basket

by

STRAIGHT[®]

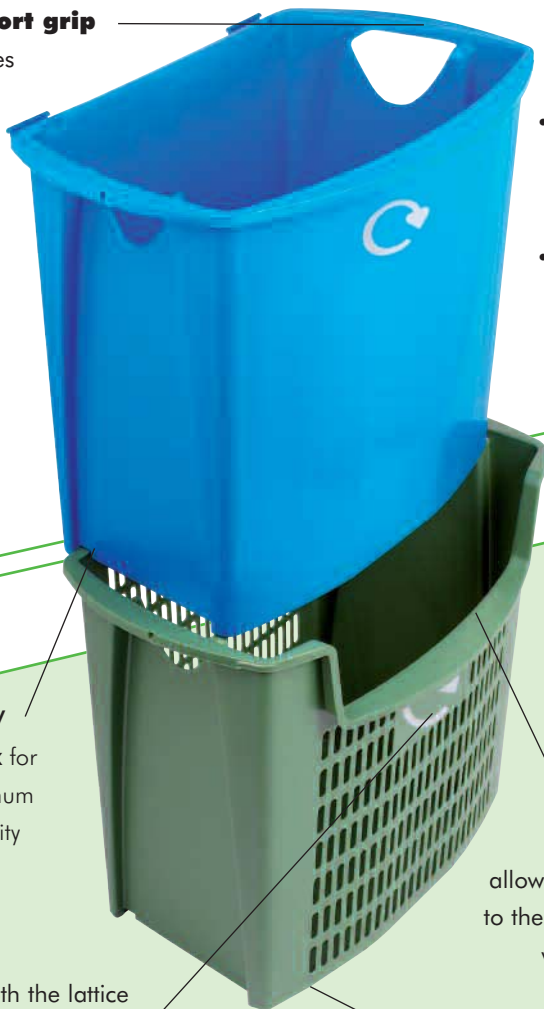

FEATURES & SPECIFICATIONS

The Kerbside Basket is used where a container is required for one single material type or where space is at a premium, for example, in flats. Designed to be used individually, in pairs or in threes, the various options available ensure a flexible solution.

Both the lattice-sided and solid-sided versions are supplied with an area for custom printed graphics and an optional drop-front allowing easy access when the containers are stacked.

The narrow footprint and unique stacking system are integral to making efficient use of limited space. The comfort-grip handles make this container an ergonomic solution for transporting dry recyclables to the kerbside or to local bring sites. An additional carry handle can be fitted to further aid lifting and this allows more than one basket to be carried at any one time.

Comfort grip handles

- Available with **lattice or solid** side
- Optional **wire carry handle**

Nest/stack for maximum flexibility

On both the lattice and solid sided versions there are **areas for custom graphics**

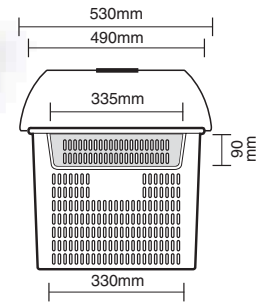

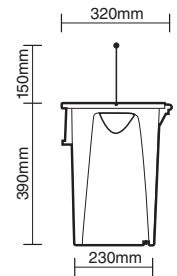

Narrow footprint therefore ideal where space is at a premium

Optional **drop front** allows easy access to the lower basket when stacked

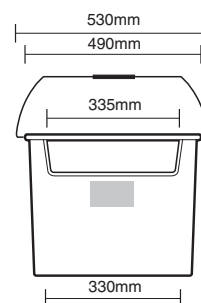

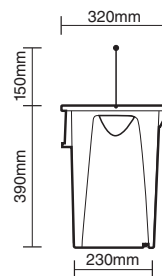

Lattice-sided Kerbside Basket with optional drop front and carry handle

Print area 120mm x 70mm

Solid-sided Kerbside Basket with optional lid

Print area 120mm x 70mm

VALUE ADDED SERVICES

Straight offers a range of value added services, such as home delivery, promotion, help lines and tracking. For further information please visit our website www.straight.co.uk

The Kerbside Basket has a wide range of options available

Basket colour

Available in a range of colours – in both recycled and virgin material. Special colours available on request, please contact us for details.

Custom graphics

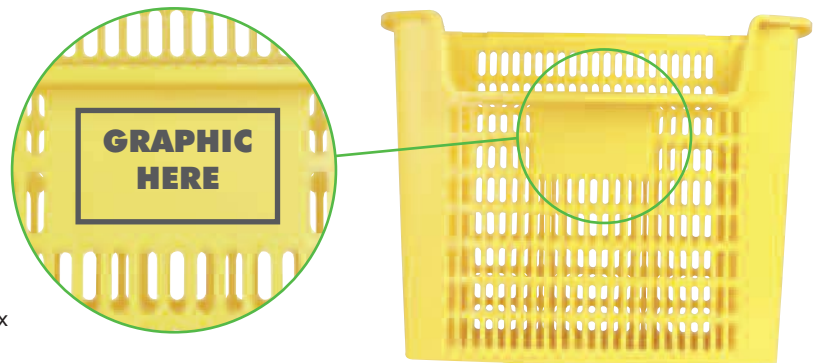

Straight plc offers a complete graphic package from origination to print.

Hot foil stamp

Custom graphics can be printed in a variety of colours. Printing is also available on the lid.

Mould-in-relief graphics

Detailed graphics can be permanently moulded into the box at the point of production.

Hinged lid

The Kerbside Basket can be fitted with a hinged lid which is designed to overhang the rim, offering protection when used outdoors. The lid still allows the unit to be stacked.

Wire carry handle

Fitted with a plastic cover grip for comfortable carrying, the wire handle is secured on each short side, offering even distribution of weight when the basket is lifted. Multiple baskets can be carried easily by one person making kerbside collections more efficient.

Drop front

The drop front provides a large letterbox aperture for posting recyclables into the basket even when stacked or fitted with a hinged lid.

Versatile and funky, these colourful and fully customisable baskets are ideal for compact modern living and recycling. The container may be used indoors, placed for kerbside collections or taken to the local bring site.
