

BATTERY BANK

The 300 litre Battery Bank is a large stylish container with multiple sections for the collection of various types of batteries.

This waterproof and fireproof bank is ideal for both indoor and outdoor use in large communal areas such as retail centres, universities and train stations.

The Battery Bank has three separate compartments with different apertures to enable the source separation of batteries including standard cells, button cells and rechargeable batteries. It also has a secure lock to avoid any tampering with the bank.

The Battery Bank can be personalised with custom graphics.

Capacity (litres)	Diameter (mm)	Height (mm)
300	500	1500
