

COMPOST MACHINE

The Compost Machine has been designed to optimise the composting process, providing a well insulated and ventilated environment.

This tough and durable composter has a twist-on windproof lid and ribbed sides for additional strength. The sturdy collar allows lifting to gain access or compost can be removed via the wide side hatch. The strong collar also bears the weight when packed minimising any possible damage.

The Compost Machine is available in two sizes: 235 litres and the large 335 litre.

The 235 litre Compost Machine is also available as a three part boxed set. This locks together in seconds without the need for tools.

Made from 100% recycled plastic and guaranteed for 10 years.

Capacity (litres)	Diameter (mm)	Height (mm)
235	990	645
335	1120	725
