# HEX BIN

## Modular recycling for urban spaces

# HEX BIN

The Hex Bin offers a flexible solution for recycling in public areas. Designed to be emptied manually, the Hex Bin is perfectly suited to parks, green spaces, schools, residential streets, railway stations, shopping malls, public amenities and indoor spaces that are difficult to access. Its compact design provides an attractive and practical solution to public space recycling where large recycling banks are unsuitable.

### KEY FEATURES

- Hexagonal shape allows almost infinite number of different arrangements.
- Can be arranged in a variety of configurations - stand-alone, in pairs, or in sets of 3,4,5 or more.
- Wide range of apertures available, including cans, paper, plastic bottles, glass, foil, cartons and green waste.
- Apertures on almost vertical face to minimise water ingress.
- Large surface areas available for application of graphics.
- Available in wide range of colours - with option for door and body in different tones.
- 90-litre liners slide out of bin body for easy manual lifting and tipping.
- Hinged door fitted with slam lock.
- Can be installed with bolts or ballast, or can be sited free-standing.
- Durable polyethylene body is impact and shatter resistant.
- Dimensions: 571mm x 659mm x 1200mm (W x D x H).

Rewind Recycling working in partnership with Straight Plc.
