

**BUTT BUTT**

The new Butt Butt has been designed for Straight plc by leading UK designers Hemingway Design. Keen to develop something new and contemporary the Butt Butt was conceived, which has the unique feature of being in the shape of a human bottom.

The Butt Butt, however, has the advantage of being both a practical rainwater collection container and a fun eye catching feature in any garden.

The Butt Butt is available in three different skin tone colours and is fitted with a tap. The front of the Butt Butt is flat allowing it to sit neatly against a wall or shed. It can be attached to the downpipe by using a rain diverter kit.

Since its launch at the Ideal Home Show the Butt Butt has proved popular within the market.
